

# Norwich Bulletin and Courier.

116 YEARS OLD.  
Published twice a week, 12c a copy, 25c a week, \$5.00 a year.  
Entered as Second-Class Matter, May 1, 1896.  
Postoffice at Norwich, Conn.,  
Telephone Office, 418.  
Business Office, 21-23.  
Subscription Office, 21-23.  
Norwich, Monday, Jan. 8, 1912.

## The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any other paper in the state. It is delivered to over 5,000 of the 4,000 houses in Norwich, and read by nearly every person in the city. It is delivered to over 1,000 in Putnam and Danbury, to over 1,000 in all of the other places in the state. It is considered the local daily.

Eastern Connecticut has forty-five postoffice districts, and the Bulletin is sent free delivery routes. The Bulletin is sold in every town and on all of the N. Y. R. routes in Eastern Connecticut.

## CIRCULATION

1911, average 4,415

1912, average 5,920

December 30, 8,317

## THE CONFESSION OF RICHESON.

To those who firmly believed in Richeson's innocence, the free confession of being the murderer of Avila is a surprise and a shock. The confession of the man who ministered to his back as a servant of the land was a surprise and a shock. The confession of the man who ministered to his back as a servant of the land was a surprise and a shock.

## WITH REFERENCE TO SEED CORN

The Windham and New London county farmers who propose to compete for the prizes offered by the Bulletin for the best seed of corn grown in either county during the season of 1912, will begin at once to figure methods for winning the prize, and the character of the seed will be second to no other problem in the contest.

## EVIDENCE FROM THREE STATES

Contributors to one of a kind or more of states that have furnished the common drinking water under the impression of the advanced public health, and new laws from Massachusetts, New Jersey and New York that the people should be aware of.

## THE HEIGHT OF FOLLY

Our political methods of road repairing have always been looked upon as a joke, but they have never been hit harder than they are now. The Connecticut Farmer comes as a case in point, and the material, just read its arraignment of the practice of pre-election activity.

## EDITORIAL NOTES.

The women realize that the January issue is the first leap year proposal to go into print. Many men believe tomorrow never comes; but the man who has endorsed a note knows it does.

## POCKETBOOKS IN WALKING STICK.

The latest styles in society walking sticks are practical as well as ornamental. One of the new canes is fitted with a coin box and a match box, these being contained in the head, which is provided with a sufficiently concealed pocket. The coin box is so arranged that a person can easily deposit or remove the money.

## LAUNDRY HINT.

For amateur laundresses know the value of gum water. For suffering faces, silks, flannel blouses and making them appear almost new it is excellent, and being free in quality than starch, it does not produce a hard look on fine faces and silks.

## NEW NEGLECTS.

Fashion's latest decree in negligees is to use two thicknesses of material, or thin silk, while for the outside and a delicate color underneath. They are separately made, and are only caught together at the seams.

## FOUGHT THE BATTLES AND HELPED PAY THE COST.

From the general criticism of the civil war veterans by the portion of the press which opposes every new pension bill and calls the old soldiers scoundrels of the treasury, one would think they had been dependent upon the government since 1862 and were receiving over 45 cents a day in the years of their decrepitude.

Twenty years ago this government was giving old men \$1.50 a week toward their support who had been through the war, and General Hawley's attention being called to it, he so amended the law that no veteran should receive less than \$2 a week.

There were a million and a half of young men who came out of the war to enter the employments of civil life and for fifteen years they were paying taxes when the interest on the national debt amounted to \$70 per capita, and while they took their pay in depreciated currency, they, without a murmur, paid the interest to the bondholders in gold which in 1867 amounted to \$147,21,282, and in fifteen years helped the government reduce the debt and bring the interest account down to \$22,548,741 in 1881.

The National Tribune, printed at Washington, remarking upon the aid they rendered the government as taxpayers, says:

"It must be kept in mind that \$100,000,000 then was a vastly greater sum for the country than it represents today. Then this amount was paid by about 25,000,000 people in the loyal section, who had only a small portion of the wealth and resources that they now have. Where the amount is given at \$140,000,000 it really represented nearly \$200,000,000, since the value of the greenback was only two-thirds of the present value, and therefore in paying the interest in gold one-third had to be added for the depreciation of the greenback."

This was not an indirect tax as today, when nobody knows or feels its burden, but it was a direct tax which everybody felt at every turn. Photographic medicine, clothing, meat, flour, sugar, coffee, kerosene, railway tickets, stores, shops, milk slaughter houses and warehouses, were all directly taxed by the United States in order to get money to pay this heavy burden of interest in gold.

"When the young veteran returned after his discharge, established a small shop, started a store, opened up a farm, went to practice medicine, or engaged in any other activity of life, the United States tax collector followed him at every step, and took a toll upon anything that he bought, used or made. The veteran cheerfully bore this imposition in the same patriotic spirit they had fought the war, because it was necessary for the salvation of the union, and they were eager to free the country from the hard grasp of the money lenders."

## COOK'S CALENDAR.

The following time table for the cooking of a variety of dishes will be found practicable and helpful: Thin fish, five to eight minutes. Thick fish, twelve to fifteen minutes. Thin steak, five minutes. Thick steak, ten to twelve minutes. Lamb chops, medium thick, eight minutes. Young chicken, twenty minutes.

## BAKING.

Plain cake, twenty to forty minutes. Sponge cake, fifty to sixty minutes. Gingerbread, thirty minutes. Rolls, ten to fifteen minutes. Pie crust, twenty to thirty minutes. Cookies, ten to fifteen minutes. Biscuits, fifteen to twenty minutes. Bread in one pound loaves, one hour. Lamb or mutton, per pound, fifteen minutes. Rib roast beef, per pound, twelve to fifteen minutes. Chicken, three to five pounds, one to two hours.

## BOILING.

Hominy, two to four hours. Rice, in double boiler, one hour; in boiling water, twenty minutes. Cornmeal, one hour. Corned beef, three to four hours. Corned beef, five to six hours, simmering. Stewed medium size, five hours. Smoked tongue, four hours. Fresh beef tongue, one hour. Turkey, small, three hours; large, four hours. Cod, per pound, six minutes. Clams, three to five minutes. Eggs, in double boiler, ten minutes. Pinhead, per pound, six minutes. Salmon and halibut, per pound, fifteen minutes.

## A BRIDE'S SLIPPERS.

One of the most well loved gifts of a recent bride was the pair of slippers which she had received from her bridegroom. The slippers were of pure white satin, but the vamp was entirely covered with lace, crocheted in baby Irish pattern of twisted white silk instead of thread. The bridegroom had cut for the lace-maker the exact shape and the effect was charming. The slippers were made in a very simple way, but the lace was a masterpiece of needlework.

## FOR THE SCHOOLGIRL.

The young girl in her teens is probably difficult to dress, but often the simplest and most sensible solution of the difficulty is to copy mother and to adhere to the tailor-made. The stripes that are so fashionable in the vogue black and gray stripes that are new now. The skirt is cut simply with an apron neck and fastened down by large buttons of the material; the coat is short and simple or double breasted without trimming, but with the collar faced with gray velvet.

## HAIR ORNAMENTS.

So far it seems that the little hair ornaments that were worn last winter, if they have been laid away carefully in cotton or tissue paper—as not to become the least bit tarnished, might be taken from their wrappings and worn again this season.

## POCKETBOOKS IN WALKING STICK.

The latest styles in society walking sticks are practical as well as ornamental. One of the new canes is fitted with a coin box and a match box, these being contained in the head, which is provided with a sufficiently concealed pocket. The coin box is so arranged that a person can easily deposit or remove the money.

## LAUNDRY HINT.

For amateur laundresses know the value of gum water. For suffering faces, silks, flannel blouses and making them appear almost new it is excellent, and being free in quality than starch, it does not produce a hard look on fine faces and silks.

## NEW NEGLECTS.

Fashion's latest decree in negligees is to use two thicknesses of material, or thin silk, while for the outside and a delicate color underneath. They are separately made, and are only caught together at the seams.

## Woman in Lile and in the Kitchen

### CONCERNING WOMEN.

The youngest church organist in the world is Angelina Spiccoli, who is only 10 years of age. She is the organist at St. Michael's Catholic church in New Haven, Conn.

Miss Helen Gould was present at the ceremonies attendant upon the inauguration of Dr. Kimer, E. Brown, as chancellor of New York university last week. A great silver torch, emblematic of learning, which was used in the ceremonies, was her gift in honor of the occasion.

Women have never been elected to professorships in the old universities of Europe until recently. The professor extraordinary of history of physics in the University of Leipzig is Dr. Octavia Wokar, and Donna Carolina Michellis da Vasconcelos has been made a professor in the University of Lisbon.

Mrs. Florence L. Barclay, sister of Maud Ballington Booth, the Salvationist, better known as the author of the "Rosary" and "Following the Star," is the mother of eight children. Her husband is the vicar of a small parish in England, and yet she holds that the novel does more good and likewise could do more harm than the pulpit. She thinks that nothing that could give the reader a lower plane of thought should come into the novel.

### WINTER COLORS.

An effective touch of orange is always striking with brown, and this has led to this color, which has been so long neglected, being revived for trimmings, especially in millinery and for very lavish wear in evening dress. Orange colored gowns, and still more, cloaks of velvet or velveteen of purple, the most striking notes of the season, and particularly pleasing when a tone of peach shines through the bloom of the deeper color and the garment is bordered with skunk or sable or brown toned marabout.

Purple and violet and all the shades within this gamut of color are peculiarly suitable for evening wear. It is the color of the sunset, and it is the color of the sea, and it is the color of the sky, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color of the meteors, and it is the color of the rain, and it is the color of the snow, and it is the color of the ice, and it is the color of the clouds, and it is the color of the wind, and it is the color of the earth, and it is the color of the air, and it is the color of the water, and it is the color of the fire, and it is the color of the sun, and it is the color of the moon, and it is the color of the stars, and it is the color of the planets, and it is the color of the comets, and it is the color
